1906 - Auguste Deter became the first patient to die from Alzheimer's disease.

On April, 1906, 51-year-old woman Auguste Deter died, and her case became the basis for Alois Alzheimer's research, which led to the identification of brain

abnormalities that were later named Alzheimer's disease. Alzheimer's postmortem examination revealed that Auguste Deter's brain had thinning of the cerebral cortex, senile plaques and neurofibrillary tangles.

1946 - The League of Nations, the predecessor of the United Nations, held its last meeting.

In 1946, the League of Nations, the predecessor of the United Nations, held its last meeting and was formally dissolved, with its assets and functions transferred to the newly established United Nations. Although the League failed to prevent World War II, its experience and some of its actions laid the groundwork for the United Nations and the modern international system.

1938 - Former UN Secretary-General Kofi Annan was born. Annan was the 7th Secretary-General of the United Nations.

On April, 1938, Kofi Annan, the 7th Secretary-General of the United Nations, was born in Kumasi, Ghana. Annan joined the United Nations

in 1962, where he worked at the Geneva office of the World Health Organization. He held several positions at UN Headquarters, including serving as Under-Secretary-General for Peacekeeping between March 1992 and December 1996. He was appointed Secretary-General by the Security Council on 13 December 1996 and later confirmed by the General Assembly, making him the first office-bearer to be elected from the UN staff.

Dear Aspirants,

"We trust that this current affairs preparation will be beneficial for your upcoming examination. Consistent daily study of current affairs is highly recommended. Should you have any suggestions for improvement or feedback regarding the class, please feel free to communicate them. Your ideas are valuable, and we welcome your assistance in helping us to provide enhanced support in the future."

We wish best for your studies & Exams
