Current Affairs (April 2026)

Question 1

Sentence: Not a single boy in the unruly class (A) / raised their hands (B) / before answering (C) / the difficult question. (D) / No Error (E)

Question 2

Sentence: By the time she retires (A) / from the prestigious firm next year, (B) / she has been teaching (C) / at the university for over 30 years. (D) / No Error (E)

Question 3

Sentence: The reduction in air pressure (A) / on high-altitude airline flights (B) / can often lessen the amount of oxygen (C) / in a passenger's blood for twenty-five percent. (D) / No Error (E)

Question 4

Sentence: Mr. Abhilash and his family (A) / have received (B) / no informations regarding (C) / the incident that took place last night. (D) / No Error (E)

Question 5

Sentence: The spokesperson refused to comment (A) / until the investigation would be completed (B) / to avoid jeopardizing (C) / the ongoing legal proceedings. (D) / No Error (E)

Question 6

Sentence: It is widely believed that (A) / the new tax policy is (B) / five times bigger than (C) / the previous one implemented by the board. (D) / No Error (E)

Question 7

Sentence: Largest or more widest rings (A) / need to be slightly bigger (B) / than thin rings to ensure (C) / a comfortable fit for the wearer. (D) / No Error (E)

Question 8

Sentence: The minister couldn't attend (A) / the charity event because (B) / his busy schedule and (C) / sudden health complications. (D) / No Error (E)

Question 9

Sentence: After running a long marathon (A) / through the city streets, (B) / the athlete was out of breathe (C) / and struggled to speak to her coach. (D) / No Error (E)

Question 10

Sentence: She is one of those (A) / exceptional employees who (B) / always does her best (C) / to meet the company's annual targets. (D) / No Error (E)

Spelling Mastery:

Current Affairs Edition (April 2026)

Question 1

Sentence: The "Multi-Hazzard Early Warning Decision Support System" (MH-EWDSS) was recently launched by the India Meteorological Department.

- (A) Hazard
- (B) Hazzard
- (C) Hazzerd
- (D) Hazhard

2

Sentence: The Government of India rolled out the "TDIP" scheme to accelerate "indiginous" telecom innovation in 6G technology.

- (A) Indiginous
- (B) Indeginous
- (C) Indigenous
- (D) Indigienous

Question 3

Sentence: Scientists have discovered a new gene "regulation" mechanism in the Tuberculosis bacterium at the Bose Institute.

- (A) Regulation
- (B) Regullation
- (C) Regilation
- (D) Regulasion

(B) Submersible

(C) Submersable

(D) Submersabel

Question 7

Sentence: The "SAMPANN" platform is a digital pension system managed by the Office of the "Controler" General of Communication Accounts.

- (A) Controler
- (B) Controllar
- (C) Controller
- (D) Controllor

Question 4

Sentence: The "Atal Pension Yojna" (APY) achieved a historic milestone this month, surpassing 9 crore total enrolments.

- (A) Yojna
- (B) Yojana
- (C) Yozana
- (D) Yojanah

Question 8

Sentence: The Madhya Pradesh government launched the "School Chalen Hum" campaign to boost universal school "enrolment."

- (A) Enrolment
- (B) Enrollment
- (C) Enrolmant
- (D) Both A and B are acceptable

Question 5

Sentence: Kazakhstan recently hosted the Regional "Ecological" Summit in Astana to discuss climate transition and food security.

- (A) Ecological
- (B) Ecologgical
- (C) Ecologycal
- (D) Eccological

Question 9

Sentence: Astronomers using the "James Webb Space Telescope" discovered water-ice clouds on a "distent" Jupiter-like exoplanet.

- (A) Distant
- (B) Distent
- (C) Distence
- (D) Distunt

Question 6

Sentence: The Indian Navy inducted "INS Aridhman," an indigenously built "submerssible" nuclear ballistic missile submarine.

- (A) Submerssible

Question 10

Sentence: The "Rongali Bihu" festival, marking the Assamese New Year, reflects the rich "culturral" traditions of the region.

- (A) Cultural
- (B) Culturral
- (C) Culturel
- (D) Culturle

Sentence Improvement:

Current Affairs Edition (April 2026)

Question 1

Sentence: The Union Cabinet has approved a new policy that aims at increasing of the efficiency of the public distribution system through AI-driven logistics.

- (A) increase the efficiency
- (B) increasing the efficiency
- (C) for increasing efficiency
- (D) No Improvement

Question 2

Sentence: Despite the global economic slowdown, India's export sector has been performing more better than most of its peer economies this fiscal year.

- (A) has performed more well
- (B) is performing better
- (C) has been performing better
- (D) No Improvement

Question 3

Sentence: No sooner had the Supreme Court issued the landmark judgment on digital privacy

when the government began drafting a new regulatory framework.

- (A) then the government began
- (B) than the government began
- (C) that the government began
- (D) No Improvement

Question 4

Sentence: The startup, which was founded only two years ago, is now one of the most valued unicorn in the Southeast Asian market.

- (A) one of the most valued unicorns
- (B) one of the more valued unicorn
- (C) the most valued unicorn
- (D) No Improvement

Question 5

Sentence: If the infrastructure project would have been completed on time, the traffic congestion in the metropolitan area would have reduced significantly.

- (A) was completed
- (B) had been completed
- (C) would be completed
- (D) No Improvement

Question 6

Sentence: The new education portal is designed to provide students with not only access to digital textbooks but also interactive mentorship sessions.

- (A) not only with access to
- (B) with access not only to
- (C) access to not only
- (D) No Improvement

Question 7

Sentence: Scientists at the ISRO headquarters believe that the success of the Gaganyaan-3 mission hinges on the astronauts' ability to manage cabin pressure.

- (A) hinge on the astronaut's ability
- (B) hinges on the ability of astronauts
- (C) hinges upon the astronauts ability
- (D) No Improvement

- (C) get his wages
- (D) No Improvement

Synonyms Challenge:

Current Affairs Edition (April 2026)

Question 1

In the recent global summit, India's approach to renewable energy was described as exemplary, setting a standard for developing nations.

- (A) Flawed
- (B) Commendable
- (C) Mediocre
- (D) Precarious

Question 8

Sentence: Several world leaders arrived in New Delhi to attend the summit, and besides they discussed bilateral trade agreements.

- (A) to attend the summit, and beside
- (B) for attending the summit, besides
- (C) to attend the summit, and furthermore
- (D) No Improvement

Question 2

The government has issued a stringent warning to social media platforms regarding the spread of deepfake content during the election cycle.

- (A) Lax
- (B) Lenient
- (C) Rigorous
- (D) Implicit

Question 9

Sentence: The Reserve Bank of India has suggested that the digital rupee be used as a legal tender for all high-value transactions by 2027.

- (A) is used as a legal tender
- (B) should be used as legal tender
- (C) be used as legal tender
- (D) No Improvement

Question 3

The CEO's perspicacious insights into the 6G market trends allowed the company to pivot before its competitors.

- (A) Dull
- (B) Astute
- (C) Ambiguous
- (D) Indifferent

Question 10

Sentence: The labor laws were amended to ensure that every worker gets their wages on the first day of every month.

- (A) get their wages
- (B) gets his or her wages

Question 4

Despite the initial setbacks, the resilience of the startup ecosystem in Bengaluru remains indomitable.

- (A) Vulnerable
- (B) Invincible
- (C) Fragile
- (D) Complacent

- (B) Mitigate
- (C) Exacerbate
- (D) Intensify

Question 5

The international court's decision was seen as a landmark ruling for climate justice and corporate accountability.

- (A) Trivial
- (B) Insignificant
- (C) Pivotal
- (D) Preliminary

Question 9

The proliferation of low-cost space-launch technologies has democratized access to satellite deployment.

- (A) Scarcity
- (B) Reduction
- (C) Expansion
- (D) Depletion

Question 6

The sudden volatility in the cryptocurrency market has led to increased calls for tighter global regulation.

- (A) Stability
- (B) Instability
- (C) Equilibrium
- (D) Stagnation

Question 10

In his farewell speech, the outgoing governor emphasized the need for frugal spending to maintain the state's fiscal health.

- (A) Extravagant
- (B) Prodigal
- (C) Economical
- (D) Lavish

Question 7

The diplomat's equivocal response to the border query left many journalists confused about the official stance.

- (A) Lucid
- (B) Ambiguous
- (C) Direct
- (D) Categorical

Question 8

The new rural development project aims to alleviate the chronic water scarcity issues in the arid regions of Rajasthan.

- (A) Aggravate

Antonyms Challenge:

Current Affairs Edition (April 2026)

Question 1

The finance minister noted that the country's surplus in the current account is a sign of robust economic health.

- (A) Abundance
- (B) Deficit
- (C) Excess
- (D) Profit

Question 2

The treaty was criticized by some nations as being too ambiguous regarding the enforcement of carbon credits.

- (A) Vague
- (B) Obscure
- (C) Explicit
- (D) Equivocal

- (B) Temporary
- (C) Perpetual
- (D) Ephemeral

Question 3

The new health guidelines issued this month are mandatory for all international travelers entering the country.

- (A) Compulsory
- (B) Optional
- (C) Obligatory
- (D) Binding

Question 7

The athlete's valiant effort in the 2026 Asian Games won the hearts of millions, despite him not winning a medal.

- (A) Courageous
- (B) Brave
- (C) Craven
- (D) Gallant

Question 4

In a surprising move, the tech giant decided to divulge the source code of its latest proprietary AI model.

- (A) Reveal
- (B) Conceal
- (C) Disclose
- (D) Publish

Question 8

The government's decision to subsidize the electric vehicle industry has led to a significant drop in consumer prices.

- (A) Support
- (B) Fund
- (C) Tax
- (D) Promote

Question 5

The regional cooperation agreement was terminated following a series of diplomatic disagreements.

- (A) Concluded
- (B) Initiated
- (C) Abolished
- (D) Ceased

Question 9

The affluence of the emerging middle class in Southeast Asia is driving a surge in global luxury goods sales.

- (A) Wealth
- (B) Penury
- (C) Opulence
- (D) Prosperity

Question 6

Experts suggest that the current market stability is merely transient, and investors should prepare for upcoming fluctuations.

- (A) Fleeting

Question 10

The judge dismissed the evidence, stating it was extraneous to the case being tried.

- (A) Irrelevant
- (B) Integral
- (C) Tangential

(D) Peripheral

Reading Comprehension Passage

The Great Silicon Shift

By April 2026, the global semiconductor landscape had undergone a seismic shift. The "Sovereign Silicon" initiative, launched by a coalition of emerging economies, successfully broke the decade-long monopoly held by a few Pacific powerhouses. India, having commissioned its third mega-fab unit in Gujarat this month, now accounts for 12% of the global supply of 5nm chips. This transition was accelerated by the integration of AI-driven lithography, which reduced manufacturing defects by 40%.

However, this industrial triumph has brought environmental scrutiny. The massive water requirements for chip cooling have led to friction between local agricultural communities and industrial hubs. In response, the 2026 United Nations Green Tech Summit in Geneva proposed a "Water-Neutral Fabrication" mandate. While tech giants claim that the new 'Dry-Cooling' technology is 90% ready, environmentalists argue that the energy consumption required for such systems could offset the carbon savings of green energy. As the world moves toward a "Compute-First" economy, the balance between digital sovereignty and ecological preservation remains the defining paradox of the decade.

Questions and Explanations

1. According to the passage, what is the primary goal of the "Sovereign Silicon" initiative?

- (A) To increase the price of 5nm chips globally.
- (B) To end the monopoly of a few dominant Pacific nations in the chip industry.

(C) To replace human labor with AI-driven lithography.

(D) To shift all manufacturing to Gujarat, India.

2. What was the specific role of AI-driven lithography in the chip manufacturing process?

- (A) It reduced the need for water cooling.
- (B) It increased the speed of chip distribution.
- (C) It significantly lowered the rate of manufacturing flaws.
- (D) It helped in the discovery of new silicon mines.

3. Which of the following best describes the "paradox" mentioned at the end of the passage?

- (A) The competition between India and Pacific powerhouses.
- (B) The conflict between agricultural needs and industrial growth.
- (C) The struggle to achieve technological independence while maintaining ecological health.
- (D) The difference between green energy and carbon savings.

4. What does the term "Sovereign" most likely mean in the context of the passage?

- (A) Royal or Monarchical
- (B) Independent and Self-governing
- (C) Expensive and High-quality
- (D) Old-fashioned

5. Why is the agricultural community in friction with the industrial hubs?

- (A) Over the high cost of 5nm chips.
- (B) Over the land being used for mega-fab units.

(C) Over the massive amount of water consumed for cooling chips.

(D) Over the noise pollution created by AI lithography.

6. What is the main criticism environmentalists have regarding "Dry-Cooling" technology?

(A) It is only 90% ready for use.

(B) It is too expensive for developing nations to implement.

(C) The energy required might negate the benefits of using green energy.

(D) It requires more silicon than traditional cooling methods.

7. Based on the passage, what is India's status in the semiconductor industry by April 2026?

(A) It is the sole producer of 5nm chips.

(B) It has recently opened its first manufacturing unit.

(C) It contributes roughly one-eighth of the world's 5nm chip supply.

(D) It has banned the use of water in its fabrication units.

8. What was proposed at the 2026 United Nations Green Tech Summit?

(A) A total ban on semiconductor manufacturing.

(B) A requirement for fabrication plants to be water-neutral.

(C) A subsidy for agricultural communities.

(D) A global tax on AI-driven lithography.

9. Which tone does the author adopt in the final sentence of the passage?

(A) Optimistic

(B) Sarcastic

(C) Cautionary

(D) Dismissive

10. The passage suggests that a "Compute-First" economy is one where:

(A) Computers are given to every citizen for free.

(B) Economic power is heavily dependent on processing power and digital infrastructure.

(C) Agriculture is completely replaced by digital services.

(D) Only "Sovereign" nations can participate in global trade.

**Today's Vocabulary Challenge:
Current Affairs (April 2026)**

Part I: Multiple Choice Questions

Question 1

The recent rapprochement between the two neighboring countries has led to the reopening of several key trade corridors and a reduction in border tensions.

(A) Hostility (B) Reconciliation

(C) Isolation (D) Embargo

Question 2

The 2026 Climate Report highlights the perilous state of the Arctic ice shelves, which are thinning at a rate that exceeds all previous scientific models.

(A) Resilient (B) Stable

(C) Dangerous (D) Prosperous

Question 3

The central bank's hawkish stance on interest rates suggests that further hikes are likely necessary to curb the rising cost of living.

(A) Peaceful (B) Aggressive

(C) Indifferent (D) Lenient

Question 4

Digital rights activists have criticized the new facial recognition law as an encroachment on the fundamental right to personal privacy.

- (A) Expansion (B) Protection
- (C) Intrusion (D) Facilitation

Question 5

The global semiconductor market is currently facing a glut, leading to a sharp decline in the prices of consumer electronics for the first time in years.

- (A) Scarcity (B) Shortage
- (C) Surplus (D) Vacuum

Question 6

The Prime Minister emphasized that achieving carbon neutrality by 2050 is paramount to the nation's long-term survival.

- (A) Secondary (B) Supreme
- (C) Trivial (D) Optional

Question 7

The tech industry is closely watching the fledgling quantum computing startup that claims to have achieved a stable "logical qubit."

- (A) Dying (B) Experienced
- (C) Emerging (D) Obsolete

Question 8

Despite the signing of the peace treaty, the situation in the disputed territory remains tenuous, with minor skirmishes reported daily.

- (A) Strong (B) Weak
- (C) Certain (D) Permanent

Question 9

The international community has called for a moratorium on the deployment of autonomous

weapon systems until ethical guidelines are established.

- (A) Acceleration (B) Temporary prohibition
- (C) Permanent ban (D) Endorsement

Question 10

The CEO's magnanimous decision to share the company's record profits with all frontline workers was praised by labor unions.

- (A) Greedy (B) Generous
- (C) Vengeful (D) Calculated

Part 2: Advanced Usage (Fill in the Blanks)

Question 1

The central bank's decision to maintain high interest rates despite slowing growth has been described as a _____ strategy to prioritize long-term stability over short-term gains.

- (A) capricious (B) prudent
- (C) precarious (D) haphazard

Question 2

The global community is calling for a _____ on the development of lethal autonomous weapons until a comprehensive ethical framework is established.

- (A) moratorium (B) catalyst
- (C) mandate (D) proliferation

Question 3

The new trade agreement aims to _____ the long-standing regulatory hurdles that have historically hindered cross-border digital services.

- (A) exacerbate (B) circumvent
- (C) obviate (D) perpetuate

Question 4

Critics argue that the government's recent surveillance law is a/an _____ on the fundamental civil liberties of its citizens.

- (A) embellishment (B) encroachment
- (C) enhancement (D) alignment

Question 5

The startup's breakthrough in solid-state battery technology acted as a _____ for a massive surge in electric vehicle investments this quarter.

- (A) deterrent (B) bottleneck
- (C) catalyst (D) paradox

Question 6

Despite several rounds of diplomatic talks, the peace process remains _____, with both sides refusing to compromise on key territorial issues.

- (A) resilient (B) intractable
- (C) malleable (D) lucrative

Question 7

The sudden _____ of misinformation on social media during the regional elections has raised serious concerns about the integrity of the democratic process.

- (A) paucity (B) proliferation
- (C) stagnation (D) abatement

Question 8

The finance minister emphasized that the country must move away from its _____ dependence on fossil fuel exports to ensure future fiscal resilience.

- (A) sporadic (B) precarious
- (C) redundant (D) superficial

Question 9

The judge's ruling was based on the premise that the defendant's actions were _____ to the

safety of the public, regardless of his intentions.

- (A) conducive (B) deleterious
- (C) innocuous (D) incidental

Question 10

In an effort to remain _____, the news agency refused to accept any funding from political organizations or government-linked corporations.

- (A) partisan (B) impartial
- (C) biased (D) clandestine

Word of the Day: "Resilient": Resilient refers to the ability to adapt, recover, and remain strong even in the face of challenges, disruptions, or failures.

In today's digital ecosystem, systems designed by companies like Netflix and Amazon are highly resilient—they continue to function smoothly even during heavy traffic, server failures, or unexpected disruptions. This ensures uninterrupted services like streaming, shopping, and cloud operations for millions of users worldwide.
