- 1) Which of the following is a term generally used to describe a new technology, but it may also refer to the continuing development of an existing technology?
 - a) Future technology
 - b) Future skills
 - c) IoT
 - d) Future processing
- 2) Future technology is usually reserved for that are creating or expected to create, significant social or economic effects
 - a) Processing
 - b) Skills
 - c) Things
 - d) Technologies
- 3) Which of the following objects to be controlled remotely across existing network infrastructure?
 - a) Future skills
 - b) IoT
 - c) Cloud computing
 - d) Saas
- 4) are key components that help you to collect live data from the surrounding environment
 - a) Sensors
 - b) Connectivity's
 - c) User Interfaces
 - d) None of these
- 5) IoT system provides substantial personal data in detail
 - a) Minimum
 - b) Maximum
 - c) Medium
 - d) All of these
- 6) Big data analytics is used in
 - a) Government
 - b) Healthcare
 - b) Banking
 - d) All of these
- 7) Which of the following is the process of collecting, organising and analysing large sets of data to discover patterns and other useful information?
 - a) Future skills
 - b) IoT
 - c) Big data analytics
 - d) User Interface
- 8) Of big data analytics refers to structured, unstructured and semi – structured data that is gathered from multiple sources
 - a) Feature
 - b) Analysis
 - c) Privacy
 - d) Variety
- 9) Virtual reality is primarily experienced through of the five senses
 - a) Two
 - b) Three
 - c) Four
 - d) One
- 10) Which technology devices is used for virtual gaming experiences?
 - a) Future skills
 - b) Virtual
 - c) Big data analytics
 - d) Blockchain
- 11) Virtual reality technology is applied to advance fields of
 - a) Medicine
 - b) Engineering
 - c) Education
 - d) All of these
- 12) is an area of computer science that emphasises the creation of intelligent machines that work and react like humans
 - a) Artificial Intelligence
 - b) Introduction to things
 - c) Future skills
 - d) Robotics

13) Which type of Artificial Intelligence embodies a system designed to carry out one particular job?

- a) Weak AI
- b) Strong AI
- c) Both a and b
- d) None of these

14) AI is important because it can help to solve immensely difficult issues in

- a) Entertainment
- b) Education
- c) Health
- d) All of these

15) Which of the following is an encrypted and distributed database that records data?

- a) Automation
- b) Blockchain
- c) Artificial Intelligence
- d) Future skills

16) Blockchain mechanism brings everyone to the highest degree of

- a) Accountability
- b) Availability
- c) Performance
- d) Analytics

17) Additive manufacturing uses software

- a) System Application
- b)
- c) Utility
- d) CAD

18) Example (s) of 3D printing is / are

- a) Eyewear
- b) Dental products
- c) Architectural Scale Model
- d) All of the above

19) RPA is the use of specialised computer programs known as

- a) Future skills
- b) User interface
- c) Software robot
- d) Artificial Intelligence

20) What is / are the business benefit (s) of RPA?

- a) Increased accuracy
- b) No interruption of work
- c) Low technical barriers
- d) All of the above

21) Can help companies offer better customer service by automating contact centre tasks

- a) RPA
- b) Interface
- c) Additive
- d) Blockchain
